Statement Concerning the Deposited cDNA Clone

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

A plasmid containing human cDNA encoding the human TR1 receptor polypeptide was deposited under the terms of the Budapest Treaty on September 29, 1994, at the American Type Culture Collection, Patent Depository, 10801 University Boulevard, Manassas, VA 20110-2209 (current address), and given accession number 75899. An ATCC receipt and viability statement is attached hereto.

Assurance is hereby given that: (1) the deposit was made under terms of the Budapest Treaty and (2) except for the limitations allowed by 37 C.F.R. § 1.808(b), all restrictions on the availability to the public of the deposit will be irrevocably removed upon the granting of a patent.

Respectfully submitted,

HUMAN GENOME SCIENCES, INC.

Date: 4/22/02

REDACTED

The deposits were accompanied by: a scientific description a proposed taxonomic description
Indicated above.

The deposits were received September 29, 1994 by this International Depository Authority and have
been accepted.

AT YOUR REQUEST:

We will inform you of requests for the strains for 30 years.

The strains will be made available if a patent office signatory to the Budapest Treaty certifies one's
right to receive, or if a U.S. Patent is issued citing the strains.

If the cultures should die or be destroyed during the effective term of the deposit, it shall be your
responsibility to replace them with living cultures of the same.

The strains will be maintained for a period of at least 30 years after the date of deposit, and for a
period of at least five years after the most recent request for a sample. The United States and many
other countries are signatory to the Budapest Treaty.

The viability of the cultures cited above was tested October 7, 1994. On that date, the cultures were
viable.
